OBJECTIVES

As a motivated and passionate MERN Full Stack Developer, I am seeking a position to apply my foundational knowledge in web development. With skills in MongoDB, Express.js, React.js, and Node.js, I aim to contribute to a dynamic team and create interactive and user-friendly applications while continuing to grow and learn in a professional environment.

INTERNSHIP EXPERIENCE

| Zoople Institution, Ernakulam

- Completed a 1-month internship focusing on the MERN stack (MongoDB, Express.js, React, Node.js).
- Developed and maintained web applications using React for frontend and Node.js with Express.js for backend.
- Worked on MongoDB for data storage and performed CRUD operations.
- Collaborated with the development team to implement RESTful APIs and integrate third-party services.
- Gained hands-on experience in debugging, version control (Git), and deploying applications.

PROJECTS

| PrimeSteps - React, Tailwind

- Developed a responsive website, Prime Steps, using React and Tailwind CSS, showcasing a modern and intuitive design with optimised performance and seamless user experience.

Github: [🌐 midelaj/primeSteps](#)

| ReactTailWindProject - React, Tailwind

- Built a responsive web application, ReactTailwindProject, using React and Tailwind CSS, delivering a clean and user-friendly interface with efficient component-based architecture.
Site: [growthdata](#)
Github: [🌐 midelaj/ReactTailwindProject](#)

| RichSense - React, Express, Node, Mongodb

- Developed "RichSense," a comprehensive MERN stack web application designed to connect financial advisors with individuals seeking financial advice. The application features an intuitive frontend built with React.js, enabling users to easily navigate and access services. On the backend, Node.js, Express.js, and MongoDB were utilized to manage user data and transactions effectively. Integrated secure payment functionalities using Razorpay, allowing users to book consultations and make payments seamlessly.

Github: [🌐 midelaj/richSense-frontend.git](#)

| Blog-CRUD-Backend - Node, Express, Mongoose

- Developed a backend CRUD application for a blogging platform using Node.js, Express.js, Mongoose, and MongoDB. Designed and implemented RESTful APIs to handle the creation, reading, updating, and deletion of blog posts. Focused on ensuring data integrity and security through robust validation and error handling. Utilized Mongoose for efficient database interactions and schema management, enabling seamless data operations and enhancing the overall performance of the application.
